

# Daily Assignment 14

- Draw following **triangular pyramid** (삼각뿔) by using **indexed triangles representation** and **glDrawElements()**:

- Start from today's practice code, modify the code.
- **Set the window title to your student number.**

(from glDrawElements() practice code in Lecture 14 slides,)

```
def createVertexAndIndexArrayIndexed():  
    varr = np.array([  
        [ 0.0, 0.0, 0.0],  
        [ 1.5, 0.0, 0.0],  
        [ 0.0, 1.5, 0.0],  
        [ 0.0, 0.0, 1.5],  
    ], 'float32')  
    iarr = np.array([  
        [0,2,1],  
        [0,3,2],  
        [0,1,3],  
        [1,2,3],  
    ])  
    return varr, iarr
```
